"In the lead up to this game we discovered that our team in motion capture suits could not complete our planned data collection in time," said Hermansson. "However, having just spent weeks in the motion capture suits, we were already tracking the high-intensity movement of our players during training on a daily basis. So we were able to convert those movements into gameplay in FIFA 22. "We've made hundreds of adjustments to the game's animation. For example, we've improved tackling animations so that players are not pushed to the ground after contact. We've also made "live" positioning updates to connect the ball to the player as it is controlled, so the ball does not behave as if it is glued to the player." FIFA 16 EA SPORTS FIFA 16, which launched for PlayStation 4 and Xbox One in September 2015, was the best-selling sports game of 2015 and sold more than 34 million copies worldwide. In the game, players can experience the complete journey of a real-world professional football match – from pre-season training to the final whistle in front of a full house. FIFA Ultimate Team FIFA Ultimate Team is the most popular free-to-play team-based gameplay mode in the world. The game mode gives soccer fans, footballers and FIFA Ultimate Team users the opportunity to play and collect players, build and customize FIFA Ultimate Teams, compete in live and online FIFA Ultimate Team Leagues, earn in-game achievements and compete in special events. In FIFA Ultimate Team, footballers are "owned" by different football clubs (each club holds a FIFA Ultimate Team Licence). Through victories, goals and trophies, clubs can increase the value of their players. In addition, to help improve players' skills and play style, they have the possibility to spend their in-game coins on Coins Packs. Created for consoles in 2012, FIFA Ultimate Team is available on PS4, Xbox One and PC. It is the launch title on all platforms, and has been downloaded more than 260 million times worldwide. I'm not sure what world President Obama is living in, but he seems to think that being a Wall St. insider with criminal connections who lies about his "achievements" is "smart." Obama was probably appointed to the Nobel Peace Prize Committee or something before he

The Collapse of Scientific Gamification You already know that there's a war on creativity in education. But you may not realize that the first targets of the war have been the things that most improve education: disruptive elements of learning. In their recent book, *Do Kids Hate School?*, Mark Bauerlein and Steven Miller argue convincingly that these elements — outside-classroom experiences, team-based learning, student-centered instruction and more — are being eliminated or forced out of education to make room for standardized testing and "the newest and most convoluted forms of [standardized] instruction." The attack on creativity in the classroom has found new allies in the form of gamification and its recent adoption in classrooms across the United States. Gamification is a term used to describe the practice of applying game mechanics to non-game activities. Now-familiar technologies like badges, leaderboards and points-based systems are being used in the classroom to make learning more engaging and motivating. This seems like a noble goal. Teaching and learning is often tedious, and many teachers need to make it more
