So it turns out it's actually just a deckbuilder with a few different twists and turns that make it different from other games of its ilk. Since we have the obvious comparison of playing cards, it seems like a pretty good "deckbuilder" - albeit with the twist of what's happening when you flick to the next card that you get dealt with the flick. Very "deckbuilder" like. But like Magic: The Gathering, when you flip cards out of a deck, you've also got a discard pile. That's where you can deal with bad cards you're not keen on. Then you have a hand of cards which you can flick back to the deck to draw more of and build the next set of combos.Simple, yes. But very, very addictive. Interresting for one is that you actually build a deck, and I see that as something that will drive some people absolutely crazy. Not that we dont have that often in the genre and that in itself isnt a bad thing but obviously it is what it is for and you have to be able to deal with that. But one thing that I really do like about this game is that if you get stuck on something, or want to really find out how something works, its pretty easy to do so. Thats not the case with Magic: The Gathering, where theres only so many tutorials you can watch and you have to go out of your way to find out how the combos work. With Roguebook, there is an incredibly good tutorial that actually explains the basics of how everything works, and I think that's really great for a game.There are two modes of play in Roguebook. You can play a straight-up single player deck building mode, or you can play two player (multiplayer) mode where you can setup two decks and play against each other. Personally I like this mode, and even though it is essentially a match type play, it works so well in my opinion. I want to feel like I'm playing a game, and not just clicking around waiting for my turn. But this gets into the things that its really easy to get stuck and get lost on and really dislike.I really had fun with this game and even though I did spend £15 on the game, it was well worth it. Its a game that I can really get lost in for hours on end, and its very easy for me to get frustrated by a lack of progress, but then I find something that just clicks in my mind and immediately I

> **On a deep and dank November evening, in a five-room apartment on the outskirts of Strasbourg, France, three intelligent readers with advanced degrees in theology, scientific philosophy and philosophy of religion listen to Star Trek novelist/historian David Embleton re-tell the story of the Gods. We've brought along a bottle of Auwein Heiwegger and a collection of classics by Jules Verne, plus some flatware to quote with. As the first episode of his talk, David narrates a scene of the original Star Trek cast taking a break from their television production. The cast assembled in this cosmopolitan, ethnic and military-sponsored apartment include Captains Kirk, McCoy, Yeoman Rand, Scotty, Nyota Uhura, Pavel Chekov, the original Mr. Spock and, most notably, the 'original' Mr. Spock — Robert Picardo. The conversation is lively, on this chilly November night in the former French Alsace, and engaged with the questions we have. As David recounts the history of Star Trek and the portrayal of the Gods in their 'extradimensional universe', we take images of these ships and our heads light up with a quizzical look of wonder. The discussion benefits from**

the shared enthusiasm of the readers and from the insights to be found in the European branch of the religion of Star Trek. We're balancing between 7 liter-bottles of Weizenbier and lemon juice. We've asked why are they in space in the first place? What are they so fascinated about? We know, we know. We should probably have asked 'why are they here?' But stars twinkling through the windows seem appropriate for a Saturday that might be spent writing. He's the author of ten books. His latest is his equal insight into the minds of the Gods. This talk is the first in a series of four talk evenings by David Embleton, about Star Trek, Transcendence and RELIGION. This slideshow requires JavaScript.
