If you would like to learn more about our privacy practices, read the attached Privacy Notice.Q: Efficient way to return a series of values in django template I have a django template I created for my django app that generates a series of urls and then inserts them into the html body of the page. I'm trying to use the {% with %} block to iterate through these urls. I have accomplished this, but

when I try to use the urls individually in the body of the webpage, they just display url1 url2 url3.... url10. Is there a way to shorten this? {% with x in range(1,11) %} {{x}} {% endwith %} What I want to do is do something like this: {% with x in range(1,10) %} {{x}} 6d1f23a050
